Foto Flaps a huge Success at Scrapbook Consumer Shows

Salt Lake City, UT- Scrapbookers have been grabbing Outdoors and More Scrapbook Décor's new patent pending Landscape and Portrait Foto Flaps by the arm full at several scrapbook consumer shows and expos. They love the ease at being able to add multiple 4"X6" pictures to a single scrapbook page layout, even scrapbook pages that were finished years ago.

The following are typical comments about Foto Flaps from consumers at the shows after a short demonstration on how easy Foto Flaps were to use:

"I can go back to finished pages and easily add all those pictures I wasn't able to add when I was making them!"

"I can use these on every scrapbook page about any subject!"

"Foto Flaps is the only new idea I've seen at the show!"

"I can add multiple pictures to a scrapbook layout AND keep pictures protected in plastic with Foto Flaps."

"Foto Flaps are great because I can use them on 8 1/2" X 11" scrapbooks as well as the traditional 12"X12" Scrapbooks."

"I love to add a little journal entry underneath each picture and would have to pull out the page to read the story. But with Foto Flaps, I can include the pictures AND the journal entry and never have to pull out the page again!"

"I like to scrapbook every picture I take, but it takes so much time to scrapbook everything. Foto Flaps now make it so I can easily add every photo to my layouts!"

Many scrapbookers at consumer shows and expos spent time calling others to let them know about Foto Flaps and ask if they wanted any as well, often leaving with arms full of Landscape Foto Flap packages and Portrait Foto Flap packages.

"We know Foto Flaps are a great product," said John Butler, creator of the popular Foto Flaps, "but the immediate and tremendous response by the general scrapbooking community has almost been overwhelming as we try to keep up with demand."

Outdoors and More Scrapbook Décor is excited to continue it's pursuit into interactive scrapbook pages and helping scrapbookers and theirs families to relive memories. To find out more about Outdoors and More's Foto Flaps, or to order some for yourself, please visit www.outdoorsandmore.com
